

# 1 Introduction

Professor: ???

## 1.1 Motivation and Introduction

- Insert module information here.
- You can use the enumerate environment, but it's probably easier to number them by hand for more flexibility anyway.

## 1.2 Assessment & Delivery

Component	Timing	Weight
Item One Here	Week 1	25%
Item Two Here	Week 2	30%
Final Exam		45%

## 1.3 Module Outline

## 1.4 Textbooks

## 1.5 Sample Notes

Notes may look something like this:

**This bit of text appears in a frame.**

This could be useful to clearly demarcate the beginning or end of a derivation or sample problem.

$$x = 1$$

You can put math in too!

Normally we put slide titles or concepts like this.

- Press Ctrl+L to create a bulleted list

- Like that
  - You can press it within a list for sub-points
  - Like that
    - \* or even sub-sub points!
- That's how that works.

Press Ctrl+Shift+V then ENTER to paste images.

The [H] argument ensures the image appears in the right place.

Use Ctrl+B or Ctrl+I to insert **bold** and *italics*.

[Lecture on 3.4]

Lastly, try to include lecture dates each time you start editing to make it easier to revise.

To do this, enter 'lec' then hit tab to get the snippet.
